

For: novel concept medical company

Subject: Thank you letter

I want to thank from the bottom of my heart, for the tremendous help to my and my husband's healing process that the drug you have developed has given us.

On 26.8, my husband and I were found verified for Corona in a pcr check. During this time my husband coughed a lot for a few days, had a high fever, muscle aches and I had similar symptoms, plus low restoration (93), severe headaches, dizziness, chest pains, severe stinging cough, difficulty breathing and high fever (close to 39) .

My medical condition worsened and all the symptoms I described got worse day by day. To my delight, I learned about the medicine your company was developing and asked for their help. On Monday 30.8 early in the morning I took the first dose of medicine and so did my husband. Throughout that day my husband started to feel better and the next morning, 31.8, 2 home tests showed he was negative. There was a benefit in coughing, he got stronger and really started to recover and recover. It took me another day, and on the morning of 1.9 my home test was also negative. The cough subsided, the breathing was significantly light, the fever of both of us dropped completely.

From that day my husband is in a wonderful recovery process. I continue to slowly strengthen my body and seem to be dealing with post-disease symptoms, especially weakness and dryness. At the same time, the healing that the drug has brought is immense and significant. This drug was really a lifesaver for both of us. Took us out of a serious illness and allowed us to begin the healing process and recovery.

I am grateful for the privilege of using a drug developed by novel concept medical. Guess without this drug I would have gone through the coronary ward in the status of a seriously ill patient. While taking it allowed for a very quick and significant healing.

I wish that every patient who needs this help will receive it and that this wonderful company, will continue to develop the drug and support a miraculous healing process as we have gone through.

Thank you very much,

Tali Brecher
